

**METHOD AND APPARATUS FOR FREEZING/THAWING/POWDERING/ DRYING**

**Patent number:** JP2002120000  
**Publication date:** 2002-04-23  
**Inventor:** FUJIMA KATSUMI; YOSHIKAWA TOMOIKU; IKEUCHI MASAMITSU  
**Applicant:** MAEKAWA SEISAKUSHO KK  
**Classification:**  
 - International: F25B9/00; B04C9/00; C02F11/20; F25J1/00; F25B9/00; B04C9/00; C02F11/18; F25J1/00; (IPC1-7): C02F11/20; B04C9/00; F25J1/00  
 - european:  
**Application number:** JP20000315112 20001016  
**Priority number(s):** JP20000315112 20001016

**Abstract of JP2002120000**

**PROBLEM TO BE SOLVED:** To provide a method and an apparatus for freezing/thawing/powdering/ drying, enabling not only uniform and highly efficient removal of moisture but also pulverization at the time of the freezing and thawing of a charged wet member, bringing about the structural destruction of the charged member by the repetition of freezing and thawing to enable powdering and drying. **SOLUTION:** The freezing/thawing/powdering/drying apparatus is constituted of an air freezing cycle 3a and a circulated fluidized bed 31 and a high speed air flow of low temperature freezing/high temperature thawing enabling heat transfer due to direct contact is formed in an air freezing cycle 30a using air as a cooling medium to be introduced into a circulating fluidized bed 31 having a circulating fluidizing medium, and the charged wet member is placed in a fluidized floating state and, through the repeated heat treatment of freezing/thawing, the dehydration, pulverization and powder drying of the wet member are performed.
